

How To Measure The Correct Door Size on a Mobile Home

A. Combo And/Or Storm

With your tape measure go outside and measure the storm door only **(just the part that swings)**. Measure from side to side and add 2 inches.

Write that number here: _____ **(width)**

Now measure how tall and add 1 inch.

Write that number here: _____ **(height)**

You now have the size you need to order

Now go on to C.

B. Back Door Or Outswing Door

With your tape measure go outside and the door from side to side **(do not include the frame - only the swinging door)**

Write that number here: _____ **(width)**

Now measure how tall (not the frame)

Write that number here: _____ **(height)**

You now have the size you need to order.

Now go on to C.

C. Determine Hinge Side

Stand outside and close the door . Face the door .

What side are the hinges on ? **Left** **Right**
