

# How To Measure The Correct Door Size on a Mobile Home

## A. Combo And/Or Storm

With your tape measure go outside and measure the storm door only **(just the part that swings)**. Measure from side to side and add 2 inches.

Write that number here: \_\_\_\_\_ **(width)**

Now measure how tall and add 1 inch.

Write that number here: \_\_\_\_\_ **(height)**

You now have the size you need to order

Now go on to C.

## B. Back Door Or Outswing Door

With your tape measure go outside and the door from side to side **(do not include the frame - only the swinging door)**

Write that number here: \_\_\_\_\_ **(width)**

Now measure how tall (not the frame)

Write that number here: \_\_\_\_\_ **(height)**

You now have the size you need to order.

Now go on to C.

## C. Determine Hinge Side

Stand outside and close the door . Face the door .

What side are the hinges on ?                      **Left**                      **Right**
